PROFILE

Aspiring Data Analyst and Data Science professional with expertise in Python, SQL, Machine Learning, Power BI, Tableau, and Statistical Analysis. Experienced in data cleaning, exploratory data analysis, predictive modeling, dashboard development, and business intelligence through academic and internship projects. Skilled in developing machine learning solutions, analyzing large datasets, and transforming data into actionable business insights. Passionate about AI, Generative AI, Risk Analytics, and data-driven decision-making.

TECHNICAL SKILLS

Languages: Python, SQL

Data Analysis: Pandas, NumPy, EDA, ETL, Data Cleaning

Visualization: Power BI, Tableau, Excel, Matplotlib

Databases: MySQL

Tools: Git, GitHub, VS Code

AI & Analytics: Generative AI, Risk Analytics, KPI Reporting, Dashboard Development, Data Visualization

EDUCATION

ICFAI University, Hyderabad, Telangana

2022–2026

B.Tech in Data Science and Artificial Intelligence

PROJECTS

Customer Churn Analysis | Python, SQL, Power BI

- Analyzed 7,000+ customer records from IBM Telco dataset to identify churn behavior and retention trends.
- Performed data cleaning, EDA, and KPI analysis using Python, Pandas, and SQL.
- Built interactive Power BI dashboards for customer segmentation and churn insights.

Credit Card Fraud Detection & Risk Analysis | Python, SQL, MySQL, Tableau

- Analyzed 280K+ financial transactions to identify fraudulent patterns and transaction risk indicators.
- Performed feature engineering, data preprocessing, and exploratory data analysis to improve fraud detection accuracy.
- Built and evaluated machine learning models including Logistic Regression and Random Forest using precision, recall, F1-score, and ROC-AUC metrics.
- Generated actionable insights to support risk management and fraud prevention strategies.

Generative AI Customer Support Assistant | Python, OpenAI API, Streamlit

- Developed an AI-powered customer support assistant using Large Language Models (LLMs) to automate customer query resolution.
- Implemented prompt engineering techniques to improve response quality, accuracy, and contextual understanding.
- Built an interactive user interface for real-time question answering and customer support interactions.
- Evaluated model performance and optimized prompts to reduce irrelevant responses and improve user satisfaction.
- Leveraged Generative AI workflows to enhance customer support efficiency and automate repetitive tasks.

EXPERIENCE

Data Analyst & Dashboard Development Intern

Jul 2025 – Dec 2025

UVXYZ Company

- Collected, cleaned, and analyzed e-commerce product and customer data to support operational decision-making.
- Designed and maintained dashboards for tracking KPIs, product performance, and business metrics.
- Generated reports and insights using SQL, Excel, and dashboarding tools to improve reporting accuracy.
- Collaborated with business and development teams to automate reporting workflows and enhance dashboard usability.

CERTIFICATIONS

- Deloitte Australia Data Analytics Job Simulation (Forage)
- Power BI and Tableau Dashboard Development Certification

ACHIEVEMENTS

- Developed and deployed multiple analytics and dashboard projects using Python, SQL, Power BI, and Tableau.
- Built and hosted a responsive portfolio website using GitHub and Vercel.
- Strong interest in Data Analytics, Business Intelligence, and data-driven decision-making.
